LOGO · SYMBOL

The mana heart, reduced

512px. A diamond core and one ring tilted 20°. The ring passes behind the upper half and in front of the lower half, with a small cut where it crosses.

THREE OPTICAL SIZES

One drawing can't stay thin and still read at favicon size, so the symbol comes in three weights. Use the smallest one that is at least as big as the display size. The enlarged tiles show the actual pixels.

actual

16px · micro

Solid core, heavier ring, no glow

actual

32px · small

Outlined core with a dot, medium strokes

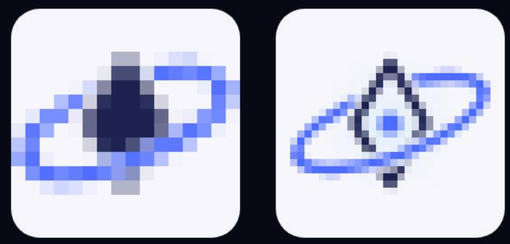

actual

64px and up · full

Thin even strokes and a soft glow

AT 16 AND 32PX ON LIGHT

Browser tabs, light and dark, at true size.

LOGO · LOCKUPS AND COLOUR

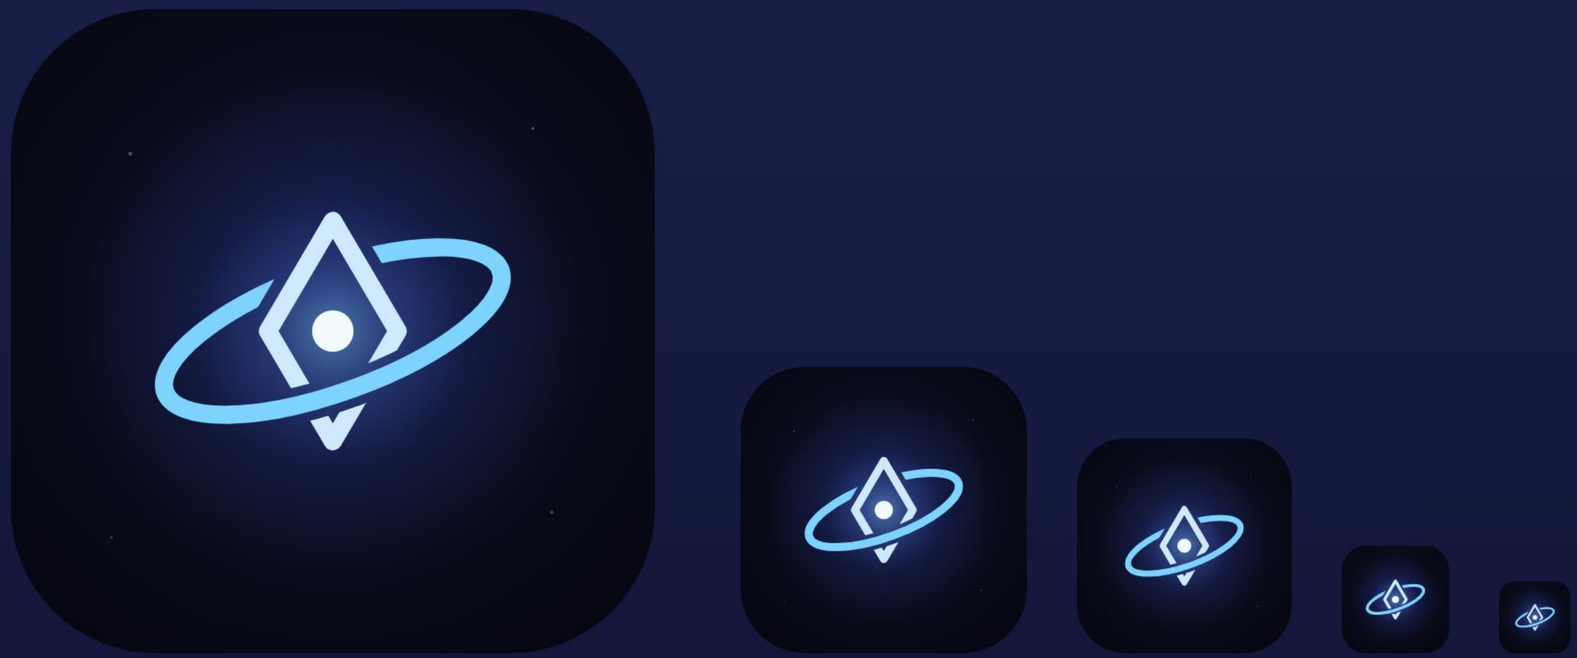

Symbol and wordmark

	HORIZONTAL	STACKED	SYMBOL
On dark Mana ring, pale core, soft glow	 Manaheart	 Manaheart	
On light Deep mana ring, ink core	 Manaheart	 Manaheart	
One colour, reversed Pale on any dark ground, no glow	 Manaheart	 Manaheart	
One colour Night ink, for print and stamps	 Manaheart	 Manaheart	

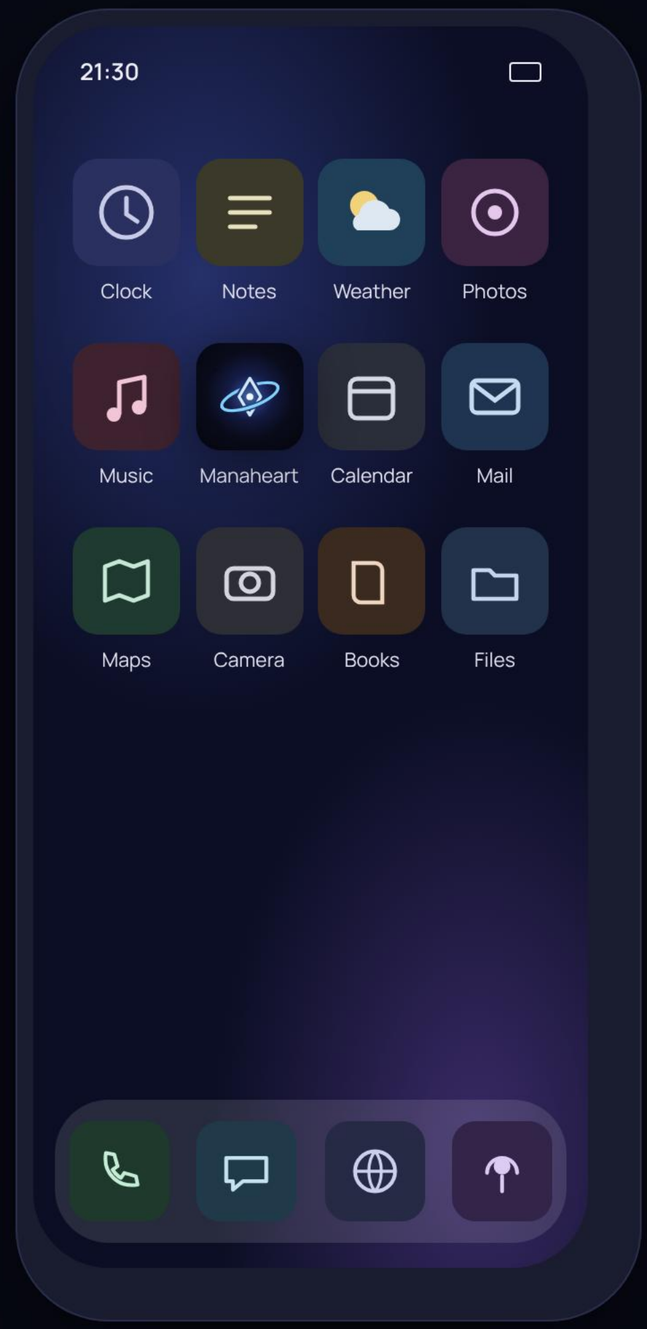

Wordmark: Cormorant Garamond Medium, tracked +160 (horizontal) and +200 (stacked), outlined in the files. In the horizontal lockup the cap height sits on the symbol's centre line. Keep clear space of at least half the symbol's height on every side.

LOGO · APP ICON

A small heart on the night sky

The icon uses the small-size weights, because on a home screen the symbol inside is only about 40px across and the thin version would fade. The ground is the Night page colour with a faint lift at the centre and four distant stars. The master is a full square so app stores can apply their own corner mask, and the rounded file is for previews.

On a home screen, at 60px
